

Protecting Our Pharmaceutical Supply Chain From China Act

Daines' *Protecting Our Pharmaceutical Supply Chain From China Act* will:

- Require the Food and Drug Administration to create a registry of all drugs and Active Pharmaceutical Ingredient's (API) that are produced outside the United States and are determined to be critical to the health and safety of Americans.
- Require that the U.S. Department of Health and Human Services, Veterans Affairs, the Department of Defense, and all other federally qualified health facilities purchase pharmaceutical products that have no APIs produced in China.
- Require drug companies to list the APIs and their countries of origin on the labels of imported and domestically produced finished drug products.
- Support American drug manufacturing by allowing immediate expensing for firms that incur costs associated with expanded pharmaceutical or medical device manufacturing within the United States.
