Dear Senator Daines,

February 24, 2021

Please oppose the confirmation of Deb Haaland as the new Secretary of Interior. Her history of supporting the Green New Deal would be a disaster for Montana. With close to 40 percent of Montana under federal land management, her policies would close more land to multiple use recreation, active resource management and energy development. Montana will surely see more unwarranted Endangered Species listings under her direction resulting in more of our federally managed public lands placed off-limits to the majority of the public.

Small communities all across Montana who depend on these public lands for their businesses and jobs would suffer tremendously under her direction as Secretary. Again, we ask you to oppose Deb Haaland as Secretary of Interior.

Sincerely,  
Kerry White  
Executive Director  
CBU
